11. Issuance of Statement Concerning Treatment of Japanese Fishermen

The General Manager said that cables had been received which indicated that the Japanese physicians who had been attending the fishermen injured in the recent fall-out incident might issue a statement to the effect that United States medical and technical officials had refused to offer significant assistance. The Chairman said that he would discuss with the Undersecretary of State the desirability of issuing an early statement concerning Japanese non-cooperation with the American officials who have offered their services.
